Dr. Jorge Kaczewer MD

OBJECTIVES

Upon completion of this webinar, participants will be able to:

1. Expand their vision about Speransky's scientific legacy.
2. Discover personal and contextual features of his biography, until now completely unknown for the western scientific community.
3. Deepen on the implications of Speransky's neuropathology and pathophysiology for the Neuraltherapeutic profession. Integrate his theories into explanatory models of the interference field in Neural Therapy.
4. Update their theoretical knowledge on the treatment techniques proposed by Speransky and his group of disciples.
